SUMMARY

Product Manager with 5+ years across B2B SaaS, AdTech, consumer products, and enterprise software, backed by a Computer Engineering foundation. Combines customer discovery, experimentation, analytics, and technical product delivery with hands-on AI-assisted prototyping, taking products from requirements and MVP definition through cross-functional development, launch, and iteration.

KEY ACHIEVEMENTS

MVP in active use Led KiddieDesk from customer discovery through AI-assisted prototyping and delivery; the MVP is now used by a school, with rollout planned to additional schools.

Approx. 10% TTR and install improvement Launched a first-to-market Apple Ads experimentation capability with Data Science validation.

+16 pts, 38% to 54% Improved complaint-submission completion through funnel analysis, session recordings, journey redesign, and experimentation.

Seven-figure enterprise agreement Contributed to conversion through strategic PoC product delivery across Product, Engineering, Sales, and Customer Success.

CORE SKILLS

Product: Discovery, MVP definition, roadmaps, prioritisation, PRDs, acceptance criteria, UAT
Analytics: A/B testing, funnel analysis, KPI tracking, behavioural analysis, SQL, dashboarding
Technical: APIs, integrations, data flows, backend/frontend coordination, Postman, API-to-UI validation
AI-Assisted Product Development: ChatGPT, OpenAI Codex, prompt/Markdown specifications, interactive prototyping

EXPERIENCE

Product Manager | Project Consultant
Jun 2026 – Present

VenusSoft – Freelance

Product consultancy delivering custom digital products across multiple industries.

- **Lead product discovery across client projects**, translating customer requirements and business problems into JTBDs, MVP scope, user journeys, detailed specifications, acceptance criteria, and prioritised delivery plans.
- **Use ChatGPT and OpenAI Codex for AI-assisted, spec-driven prototyping**, turning approved requirements into functional prototypes and structured Markdown specifications that make product behaviour and flows tangible before full development.
- **Validate prototypes directly with customers**, walking through end-to-end journeys, refining requirements and scope, and securing alignment on the intended product experience before transitioning the work to UI/UX and Engineering.
- **Own product delivery after validation**, coordinating with UI/UX and development teams, clarifying requirements and tracking scope, dependencies, and timelines to ensure the delivered product matches agreed customer needs.
- **Delivered KiddieDesk as a selected client project**, taking the preschool operations SaaS product from discovery and customer-validated prototype through cross-functional MVP delivery; the product is now used by a school, with rollout to additional schools planned.

Product Manager
Apr 2025 – Mar 2026

MobileAction (Apple Ads)

B2B SaaS platform for Apple Ads campaign management and optimisation.

- **Delivered a first-to-market Product Page A/B Testing capability** for Apple Ads, turning a recurring manual workflow into a statistically validated product in partnership with Data Science and improving TTR and installs by approximately 10%.
- **Delivered an enterprise Pacing Monitor** from discovery to launch, defining configurable KPI targets, pacing logic, and risk thresholds for multi-campaign monitoring.
- **Scaled a customer pain point into Scheduled Budget Allocation,** enabling advertisers to automate budget changes around seasonal and high-demand periods, with strong adoption after release.
- **Contributed to a seven-figure enterprise agreement** by coordinating customer-committed product requirements across Product, Engineering, Sales, and Customer Success during a strategic PoC.

- **Shaped roadmap and technical product decisions** through advertiser-account and usage analysis, weekly customer interviews, support signals, competitor research, and collaboration on Apple Ads API, bidding, automation, and experimentation trade-offs.

Product Manager
Sep 2023 – Apr 2025

Şikayetvar

High-traffic consumer complaint platform and B2B reputation-management SaaS.

- **Improved complaint-submission completion by +16 pts, from 38% to 54%,** using funnel analysis, session recordings, journey redesign, and experimentation, including an LLM-assisted topic and title experience.
- **Improved review submissions by 15% MoM and app rating from 4.6 to 4.8** by introducing a contextual review prompt after the main successful user journey.
- **Reduced work returned from testing by approximately 10% QoQ** through clearer PRDs, user stories, acceptance criteria, process flows, prototypes, and UAT support.

Product Manager
Apr 2022 – Aug 2023

Nanodems

B2B physical-security platform integrating video, IoT, and transaction data.

- **Delivered a retail fraud-investigation workflow** integrating POS transaction data with CCTV footage in a unified interface for enterprise customers.
- **Turned customer-defined fraud scenarios into product workflows** through direct discovery and biweekly validation, coordinating design, development, testing, and PoC training.
- **Supported enterprise and international opportunities** through product demonstrations and technical use-case discussions with directors, executives, and prospects.

Product Manager
Oct 2021 – Apr 2022

Call Center Studio (Alotech)

Cloud-native omnichannel contact center software (SaaS).

- **Simplified complex IVR configuration** by researching usability problems, translating customer findings into a drag-and-drop concept, and validating the workflow through Figma prototypes and user sessions.
- **Improved multichannel workflow usability** by converting customer and behavioural insights into backlog priorities, product requirements, and subsequent iterations.

Software Developer | Product Manager
Sep 2020 – Oct 2021

BAYKURT

Agricultural tracking and mobile app provider.

- **Combined hands-on Flutter development with product ownership** for an agricultural tracking application, translating customer needs into requirements, workflows, UI/UX decisions, and implementation.
- **Improved product adoption through direct PoC work** with farmers and customers, using demonstrations, training, and field feedback to guide product iterations.

EDUCATION

B. Sc. in Computer Science & Engineering
Sep 2015 – Jun 2020

Bilkent University

- Awarded a 100% merit scholarship for undergraduate studies.
